PROCEEDINGS AND DEBATES OF THE 114th CONGRESS, SECOND SESSION

Vol. 162

WASHINGTON, WEDNESDAY, FEBRUARY 10, 2016

No. 24

House of Representatives

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. JODY B. HICE of Georgia).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
February 10, 2016.

I hereby appoint the Honorable JODY B. HICE to act as Speaker pro tempore on this day.

PAUL D. RYAN,
Speaker of the House of Representatives.

MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 5, 2016, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate.

The Chair will alternate recognition between the parties, with each party limited to 1 hour and each Member other than the majority and minority leaders and the minority whip limited to 5 minutes, but in no event shall debate continue beyond 11:50 a.m.

DEDICATED WATER INFRASTRUCTURE TRUST FUND

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, I came to Congress committed to helping the Federal Government do a better job dealing with water and sanitation. We have had great success internationally raising the profile and directing more money in a more effective way to deal with water and sanitation in poor countries, making a difference in millions of lives.

In the United States, we often take those conditions for granted. But as has been demonstrated recently in Flint, Michigan, we do so at our peril because we have serious problems right here in the United States. It is not just Flint, Michigan. There are up to 10 million lead water lines that remain where even a slight change in the water chemistry, even from just repairing it, can damage lead pipes enough to start contaminating people's water. What is underground and out of sight is actually in worse condition than our crumbling roads and bridges. America leaks more water than we drink every day.

In the aftermath of the recession, we have seen States cut drinking water budgets and staff. The Federal Government had cut our investment in drinking water infrastructure by more than 80 percent by 1980. This, despite the fact that ours is a growing country with aging infrastructure that was rated a D by the American Society of Civil Engineers in their latest report.

Now, I am pleased that the administration in its budget would put a little extra money to help replace lead pipes. Sadly, that is being financed by cutting even more from the Clean Water State Revolving Fund, essentially at the expense of keeping water clean in the first place.

We should look at our water infrastructure as an entire system and increased Federal investment is long overdue. We would have to increase our funding 500 percent to reach the level of spending during Jimmy Carter's presidency.

I have long advocated the development of a water infrastructure trust fund. We have reintroduced a bipartisan, budget-neutral solution to create a dedicated water infrastructure trust fund to provide additional revenue to State and local water and sanitation projects. It is financed by a voluntary program where businesses that rely heavily on clean water, like the bev-

erage industry, for example, that have a keen interest in maintaining water infrastructure would, on a voluntary basis, pay a miniscule fee. In exchange, they would be designated as supporting the clean water trust fund.

It is estimated that this could generate up to \$7 billion annually in new revenue that could go to State and local governments as grants and loans, which in turn could leverage even more money.

This legislation would also give direction and resources for the EPA to deal with the affordability gap. We can actually finance much of the needed water and infrastructure improvements, but we are hamstrung because there is understandable reluctance to raise rates that fall too much on the poorest of citizens. Thus, we are in a cycle of unpaid water and sewer bills that leaves nobody with satisfactory alternatives.

This legislation would give more money to State and local governments, allowing them to leverage additional money and to focus on ways to deal with a very substantial problem of low income for whom access to safe drinking water and sanitation is every bit as fundamental a human right as what we are doing to help poor people overseas achieve.

Mr. Speaker, I celebrate Secretary Clinton and a number of our colleagues going to Flint, Michigan, to focus on the problem. I applaud people who are looking at where the system failed, but I would hope we would pay as much attention to the systematic failure of Congress and at the State level to attach priority to this fundamental building block for a livable community.

I hope my colleagues will join me, not just in cosponsoring H.R. 4468, but enacting the trust fund and fighting for budgets that represent the resources this crisis demands.
